

## **LECTURE ONE:**

### **DEFINATION/ SOURCES OF POLLUTION/AND ROUTES OF EXPOSURE**

*MODULE 2*

***ENVIRONMENTAL POLLUTION***

*PROF. RIM ABD-EL HAMID*

#### **LEARNING OBJECTIVES**

- Definition of pollution
- Know the routes of human exposure to potentially toxic chemicals and the ways in which resultant effects may depend upon these routes, exposure pattern and the properties of the chemicals.
- Recognize the relationship between exposure and dose
- Know about allergy and its possible consequences.
- Understand idiosyncratic reactions, delayed effects and irreversible effects.
- Recognize the complexities of possible interactions between chemicals and their effects.
